Praise God for over £1 million income in 2020. Pray for continued provision.

Pray for growth in Church engagement & for acquiring new donors

THE LEPROSY MISSION'S GLOBAL DAY OF PRAYER

ZERO TRANSMISSION

Hospital's futures at risk due to shortfalls of tens of thousands of pounds.

Less people diagnosed as many programmes unable to run due to Covid, which in turn means that transmission is not stopped

When people aren't diagnosed early they can continue to spread leprosy to others.

Travel restrictions due to Covid, many have not been able to access hospital services or are too frightened to go to hospital

Thankful for learnings as a result of Covid, for both NI and programmes.

Prayer and income support essential to ensure Zero leprosy transmission by 2035 becomes a reality. New partnerships and supporters key!

People with disabilities caused by leprosy face a lot of discrimination as effects are visible. More disability = more discrimination.

Many people drawing similarities between Covid and leprosy which is fuelling misinformation about leprosy. Many people using the word 'leper'.

ZERO DISCRIMINATION

Disability & Discrimination usually mean that individuals have little access to employment which perpetuates a vicious cycle of hand-to-mouth existence. Covid has made this situation worse

People not diagnosed due to Covid, means disability rates will be higher and more people will have life altering conditions.

Covid has caused many delays in the delivery of MDT; the vital cure to leprosy. This means more people will suffer from disabilities as a result of leprosy.

Self help groups unable to run due to social distancing. Many help with disability prevention.

ZERO DISABILITY
